

January 21, 2013

To Whom It May Concern:

I have had the opportunity to review the 18-month City of Dublin diesel fuel summary report prepared by Eco Chem Alternative Fuels, covering the period from June, 2011 through the end of the 2012 calendar year. All of the initial data used to prepare this report was supplied by the City of Dublin and was gathered using our fuel tracking software. The data and results included in this report are accurate and the summary is an accurate reflection of various steps that were taken during the 18-month period.

The City of Dublin recently renewed our contract with Eco Chem for the continued purchase of High Performance Clean Diesel (HPCD). We have been extremely satisfied with the results of the fuel and the associated cost savings. Furthermore, we have found the Eco Chem staff to be professional, responsive and focused on continual improvement and innovation. If you should have any questions regarding this report or the City of Dublin's experience with High Performance Clean Diesel, please do not hesitate to contact me.

Sincerely,

Michelle L. Crandall
